

**Working together
to create a more
secure world.**

ID Authentication

Facial Matching

Watch List Management

Our Mission

To create a more secure world by delivering innovative identity solutions, enabling our partners to truly know their customer.

Your Result

With Veridocs™ you can be certain you will have the most advanced identity management and document authentication solutions in your arsenal against fraud. You can also be certain that you have chosen the best identity management partner in the industry.

Our dedication to customer support and innovative development means that you will always have the most up-to-date and sophisticated identity management tools.

OUR TECHNOLOGIES

TrueAuthentication

Real-time authentication for government-issued IDs

Don't just verify. Authenticate. In seconds, TrueAuthentication goes beyond basic ID scanners to confirm all readable components of an ID and its security features.

- ✓ Be certain with easy-to-interpret results
- ✓ The most frequently updated document library available
- ✓ Reduces staff errors in ID checks
- ✓ Confirms authenticity of security features utilizing three light sources in seconds
- ✓ Utilizes RFID information if available
- ✓ Easily integrates with other applications

TrueCompare

Real-time facial comparison between an ID photo and the person presenting it

TrueCompare™ captures a live image of a patron presenting a photo ID and performs a real-time facial comparison with the photo on the document, adding a valuable layer of authentication to know-your-customer efforts.

- ✓ Ideal for unstaffed locations such as self-service kiosks
- ✓ Protects against one of the most common forms of ID fraud - using someone else's ID
- ✓ Reduces human error and subjectivity in ID checks
- ✓ Enables more secure self-service transactions

TrueListCheck

Fast checking of blocklists and safelists via an easy-to-use and integrate web service

TrueListCheck™ interfaces with government watch lists, proprietary third-party lists and internal customer lists—such as VIPs (safelists) or banned individuals (blocklists).

- ✓ Real-time watch list management
- ✓ Compatible with most lists including customer lists, regulatory/government watch lists, and third-party subscriber lists
- ✓ Assists with regulatory compliance, KYC, and customer service

VALUE PROPOSITION

Fighting Fraud

As fraudulent IDs become more sophisticated and more common, it is imperative for organizations around the world to take measures to protect their operations, employees, and customers.

With the high quality of many fake IDs, a basic barcode scan is no longer enough to validate an ID, as bar codes are one of the easiest elements of an ID document to fake. Visual inspection of the ID—even with the assistance of software that captures an

image and compares the ID to a database—is no guarantee of security either. The varying quality of mobile device cameras, lighting, and user capabilities all impact the quality of the images captured, as does the use of only one light source (white light).

Powerful Authentication

In contrast, Veridocs TrueAuthentication® technology retrieves and verifies data from all readable components of an ID, and also verifies its security features using three light sources—white, UV and infrared.

TrueAuthentication not only confirms a match between a document's printed and encoded (barcode and chip) data, but also provides assurance that all UV and infrared security features built into each individual document have been authenticated.

This powerful technology combined with Veridocs' advanced list checking and facial match capabilities gives organizations a highly secure, multi-layered approach to being certain of patrons' identities. That's the benefit of Veridocs' more than 15 years of expertise in document authentication.

The Industry's Best

Veridocs is the number one provider of identity management and document authentication to the gaming industry—one of the most highly regulated industries in the world. We are a leading supplier of document authentication globally.

Veridocs' solutions run 24 hours a day, 7 days a week, 365 days a year. And just in case there may be a question, our second-to-none support is also available 24/7/365.

Veridocs' identity-related software is developed and maintained internally by in-house employees based at our Lexington, Kentucky location. Additional partners in North America, Europe, Asia and Australia help us meet our global customers' needs.

The Veridocs Difference

- ✓ Most frequently updated document library available
- ✓ Easy-to-interpret results
- ✓ Simple to integrate with included SDK and demo application with open source code
- ✓ TrueAuthentication® utilizing three light sources
- ✓ Contactless solutions
- ✓ 24/7/365 customer support that is unparalleled in the industry
- ✓ Real-time information and results in seconds
- ✓ Provides a safer and more secure environment
- ✓ Highly rated customer service

THE VERIDOCs™ WAY

Collaborate to innovate

We respectfully engage to ask questions and challenge ideas as we proactively lead innovation.

Know where you're going

We are nimble as we develop responsive plans and strategies that lead us to our vision.

Own each other's success

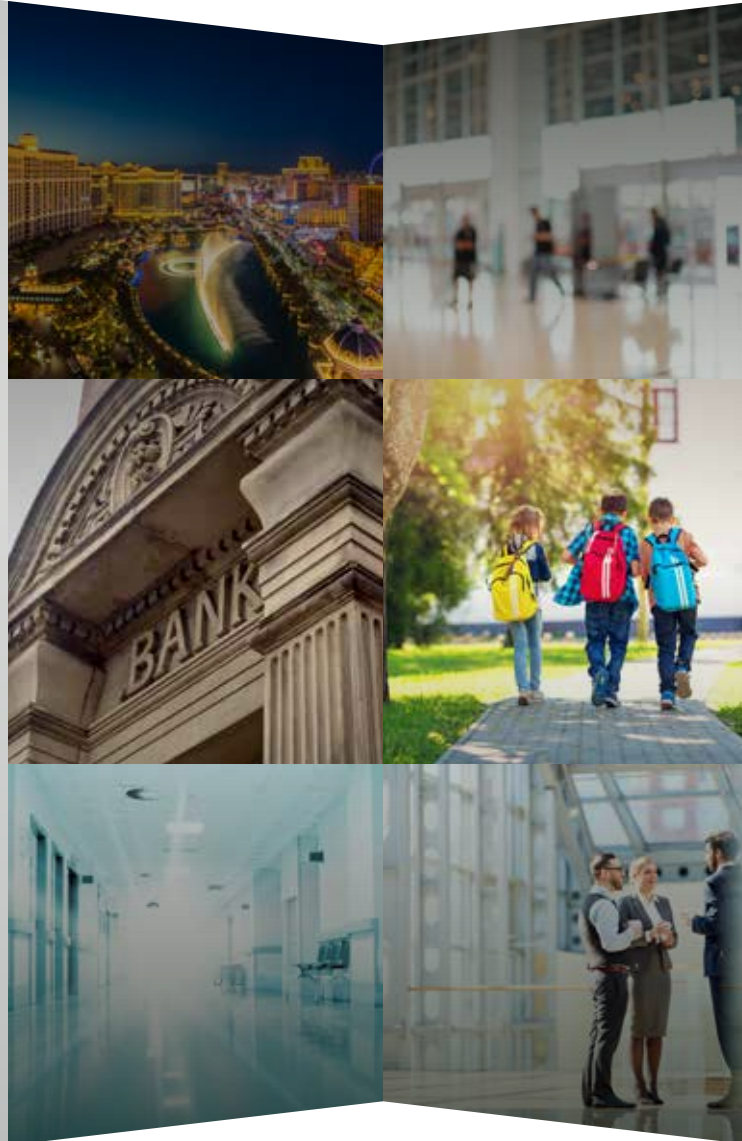

We all have an individual responsibility to contribute to the success of our team and our partners. We must all do our part to succeed together.

OUR SYSTEMS

TITANTOWER

Identity Management

Veridocs provides complete identity management systems to the casino industry with easy-to-use applications and user interfaces. TitanTower provides real-time identity management to create a more secure environment and ensure regulatory compliance.

BRIGHTTOWER

Safety & Security Systems

In collaboration with our partners, Veridocs™ provides complete safety and security systems to industries and markets such as schools, healthcare facilities, banks, commercial buildings, and construction sites. These systems integrate the Veridocs™ technologies with visitor management, on-line and on-site training, security assessments, incident monitoring video options, and on-call security and safety experts.
