

Enhance client service. Strengthen security.

Combine sophisticated ID readers, cameras, software and training to raise the bar for your institution's service and security.

- ✓ Authenticate identification documents
- ✓ Speed client service and data population
- ✓ Reduce fraud
- ✓ Increase security during openings, closings, & active incidents
- ✓ Provide on-demand safety and security training

Tier 1 Services

ID Document Authentication

- Sophisticated, contactless authentication of client IDs
- Option to save ID scan data
- Facial matching of ID photo and person presenting the ID

Security Monitoring

- Security cameras with covert triggers
- Monitoring of daily branch openings & closings
- Active threat monitoring

On-Demand Staff Training

- Expertly designed, banking-specific online learning modules
- Value-added modules on safety in homes and communities

Tier 2 Services

Everything included in Tier 1, plus additional options:

- Automatic recognition of enrolled clients and staff
- Watch list checks
- Integration/auto-population with CRM and other systems
- Touchless temperature checks
- Visitor management and logging for COVID-19 compliance and contact tracing
- Custom consulting with safety and security experts

Improved service is just the beginning

- ✓ Exceeds standard client ID management systems
- ✓ Exclusive security technology and expert training
- ✓ On-demand learning and consulting services

Our effective, easy-to-deploy system layers ID readers, cameras, software and training to improve physical security, enhance service and prevent fraud at your financial institution. With ID authentication tools proven in the highly regulated gaming industry, you can Know Your Customer in real time.

Staff can take advantage of on-demand learning modules designed by safety and security experts. The same experts are available for custom consulting to help address your institution's unique needs.

*BrightTower is an integrated safety & security system
made possible by a partnership between:*

Veridocs is a world leader in institutional security and safety. The company's roots in casino gaming—one of the most highly regulated industries with sophisticated technology demands—make it an ideal partner for other organizations in need of efficient tools to perform real-time ID authentication and visitor management.

Blue-U Defense is a leader in highly innovative, turnkey, organizational safety and security management solutions. Its Blue-U Safe Turnkey Safety Solution is a one-of-a-kind, subscription-based service designed to provide effective, ongoing, and systematic training that contains all of the elements necessary to achieve true organizational and personal safety.
