

Automate jobsite entry control and increase security

Combine sophisticated technology and specialized training to raise the bar for your jobsite's safety and security.

- ✓ Authenticate identification documents
- ✓ Improve entrance management and tracking
- ✓ Reduce fraud and theft
- ✓ Covert incident monitoring
- ✓ On-demand safety and security training

Primary System

ID Document Authentication

- Sophisticated, contactless enrollment & ID authentication
- Facial matching of ID photo and person presenting the ID
- Employee/contractor entry and exit logs
- Monitor all jobsite entrances with automatic logging of activity
- Facially identify enrolled employees, contractors, and frequent visitors

Security Monitoring

- Security cameras with covert triggers
- Active threat monitoring

On-Demand Staff Training

- Expertly designed, online learning modules
- Value-added modules on safety in homes and communities for employees and contractors

Options

- Watch list checking
- Integration/auto-population with time card and other systems
- Visitor management and logging
- On-site security assessments
- Custom consulting with safety and security experts including OSHA

Improved safety and security are just the beginning

- ✓ Exceeds standard jobsite safety and security systems
- ✓ Exclusive safety and security technology and expert training
- ✓ On-demand learning and consulting services

Our effective, easy-to-deploy system layers ID readers, cameras, software and training to improve physical and personal security, enhance the entrance process, and reduce theft and fraud at your jobsite.

Employees, contractors and their families can take advantage of on-demand learning modules designed by safety and security experts. These same experts are available for on-site safety and security assessments and custom consulting to help address your unique needs.
